

Our contribution towards environment protection

Environmental awareness is about being aware of the state of the Environment. The environment refers to all parts of nature, living and nonliving.

Airaa Academy is a centre for facilitating a place that gives guidance to bring in awareness regarding all areas including the environment, believing it is the main and vital area.

Teaching them environmental awareness from an early age is one of the Goals of the school, for the earlier they learn about the environment, the more they'll care about protecting it.

Being aware of the environment, Learners have done various activities related to the below topics. Listed below are various activities we had had during the academic years and a few ideas on how we cultivate environmental awareness in schools.

- Climate change.
- Global warming.
- Water scarcity.
- Deforestation.
- Floods.
- Pollution.
- Conservation.
- 3R: Reduce, Recycle, Reuse.
